LEAP@THS

High Potential and Gifted Students Program

Applications are open now for Year 7 2026

Learning - Enrichment - Acceleration - Pathways

Excellence in Education

LEAP is a high potential and gifted students program that was introduced in 2013 at Toronto High School. The program caters for students in Year 7-10, and has continued to develop to meet the needs of high potential and gifted students seeking to attain academic excellence.

LEAP provides enrichment and acceleration programs to enable students to realise their potential. Challenging academic material and deep engagement through problem based learning are central components of LEAP.

Students are supported throughout their learning with consistent pastoral care integrated in the LEAP faculty and whole school wellbeing structures.

Opportunities

Achievement

At it's core the LEAP program supports students to aim for and achieve academic excellence. Students from the program have progressed to attain outstanding levels of achievement in the HSC and a wide range of higher education pathways.

Technology

LEAP has a strategic focus on embedding technology into learning. The continually evolving opportunities that technology provides have been harnessed by LEAP since it's inception through a 1:1 iPad initiative.

Extra-Curricular

LEAP students participate in a wide range of extra-curricular activities with access to both whole school programs and LEAP specific opportunities.

Supporting students to achieve their potential
